

# Maritime & Underwater Security Consultants www.mandusc.com

The screenshot shows the MUSC website's 'UXO Services' page. The header includes the MUSC logo and navigation menus for Subsea, Maritime Security, Environmental, Training, Quick Links, News, Contact, and Share. A search bar is located in the top right. The main content area features a large image of a beach with orange markers, titled 'UXO Services'. Below this is a 'Latest News' section dated 23 January 2011. The main text describes the company's expertise in maritime and underwater work, including clearance diving and survey services. A list of services covered includes feasibility studies, permit assistance, pre and post area surveys, ordnance clearance, in-situ destruction, area security, and sourcing of specialist equipment. A sidebar on the right contains a 'Project Search' form, a 'Contact Us' section with phone and email details, and an 'Important Information' section mentioning IMCA membership.

The screenshot shows the MUSC website's 'Ship Security Officer (SSO)' page. The header is consistent with the previous screenshot. The main content area features a large image of a ship, titled 'Ship Security Officer (SSO)'. Below this is a 'Latest News' section. The main text describes the course aim, which is to provide training for ship's officers in accordance with the International Ship and Port Facility (ISPS) Code. The course covers implementation and maintenance of a ship security plan, managing and monitoring security systems, and training crew. A sidebar on the right contains a 'Project Search' form, a 'Contact Us' section, and an 'Important Information' section mentioning IMCA membership.

The screenshot shows the MUSC website's 'Contact Us' page. The header is consistent with the previous screenshots. The main content area features a large image of a building, titled 'Contact Us'. Below this is a 'Latest News' section. The main content includes a map of London and Wellington, with contact details for both offices. A sidebar on the right contains a 'Project Search' form, a 'Contact Us' section, and an 'Important Information' section mentioning IMCA membership.

Whilst you might at first be forgiven for thinking the acronym sounds a little like a 1970's aftershave, MUSC are actually pretty hi-tech Maritime & Underwater Security Consultants who deal with the kind of stuff we all hear about on the news (piracy, unexploded ordnance and more) from time to time but are actually quite pleased we don't have to do anything about.

The site utilises our bespoke content management system to offer the client complete control over the site content, right down to plotting their latest projects on a global map (not the confidential ones obviously, that would be wrong).
