

At first glance, you could be mistaken for thinking that Wizard must be the Famous Fives favourite IT specialists, but they aren't, that would be ridiculous. They do however, provide IT & network support services to satisfy the most demanding requirements, mainly in the private equity sector.

After creating the client a new logo and brand guidelines, we built this sleek, smart website to help Wizard expand their clientele in certain key industry sectors and the design of the site was tailored to help them achieve that goal. It's been very successful too.
