

Scotia

Branding, stationery, website & various documentation

The stationery was digitally printed (to minimise any overrun on printing) on Revive 100 uncoated paper. Being made from 100% post-consumer reclaimed material Revive 100's eco-credentials are, like Scotia's, second to none.

The brand was successfully extended across an online presence (right). It was completed in a speedy two weeks to meet the start of the UN's 2009 Climate Change Conference in Copenhagen.
