

Wizard IT
 Logo, branding, brochure, stationery and more...

At first glance, you could be mistaken for thinking that Wizard must be the Famous Fives favourite IT specialists, but they aren't, that would be ridiculous. They do however, provide IT & network support services to satisfy the most demanding requirements, mainly in the private equity sector.

A new logo and brand guidelines were created to reflect, and expand upon, the high profile clientele that Wizard had in key industry sectors. A dominant black is punctuated by a vibrant orange to reflect the high-end and modern IT services on offer.
